Summary

Aspiring **Software Developer** skilled in **Python, JavaScript (React, Node.js), and full-stack web development**. Experienced in building **scalable web applications, fintech platforms, and developer productivity tools**. Passionate about creating robust, user-friendly, and efficient software solutions.

Skills

- **Languages & Tools:** Python, JavaScript (React, Node.js), SQL, Flask, Git,
 - **Web Development:** React.js, Node.js, MongoDB, PostgreSQL, Firebase, Tailwind CSS
 - **Other:** GitHub, VS Code, Cloud Deployment (Heroku/Render), AI APIs (LLM, OpenCV)
-

Experience & Contributions

Open-Source / Freelance Contributions (2024 – Present)

- Contributed to GitHub projects (bug fixes, feature enhancements, documentation).
 - Built reusable React components and integrated REST APIs in peer projects.
 - Collaborated with developer communities to improve code quality and scalability.
-

Projects

AI Code Reviewer – *Python, Gemini API, Static Code Analysis*

- Built an AI-powered tool to analyze Python/JS code for bugs and inefficiencies.
- Automated feedback reduced review effort by **30–40%**.

AJ Wallet (Fintech App) – *React.js, Node.js, Express, MongoDB/Firebase*

- Developed a secure digital wallet for expenses, transactions, and savings goals.
- Implemented authentication and payment simulation APIs; tested **100+ transactions/day**.

AI-Powered Resume Matcher – *Python, Gemini API, React.js*

- Designed a tool to evaluate resume-job fit with similarity scoring & keyword highlights.
 - Built a real-time recruiter dashboard; improved shortlisting efficiency by **20%**.
-

Education

Indian Institute of Technology Madras

BS in Data Science & Applications (Diploma Level, Ongoing) | Expected Graduation: 2028
